Requirements	Incomplete (0)	Does Not Meet Expectations (1)	Meets Expectations (2)	Exceeds Expectations (3)
Read in your dataset, determine how many samples are present, and ID any missing data				×
Create a table of descriptive statistics for each of the variables (n, mean, median, standard deviation)			×	
Describe the distributions of your data		×		
Plot box plots for each variable		×		
Create a covariance matrix				×
Determine any issues or limitations, based on your exploratory analysis			×	
Outline exploratory analysis methods				×

Use .describe for summary. Graphics don't really show us what we need; let's connect if the solution code I share doesn't make sense. Notes:
