Requirements	Incomplete (0)	Does Not Meet Expectations (1)	Meets Expectations (2)	Exceeds Expectations (3)
Read in your dataset, determine how many samples are present, and ID any missing data				X
Create a table of descriptive statistics for each of the variables (n, mean, median, standard deviation)			X	
Describe the distributions of your data		X		
Plot box plots for each variable		X		
Create a covariance matrix				X
Determine any issues or limitations, based on your exploratory analysis			X	
Outline exploratory analysis methods				X

Notes: Use .describe for summary. Graphics don't really show us what we need; let's connect if the solution code I share doesn't make sense.
